

welcome your next energy investment

Real Assets. On-chain. For Everyone.

 Nexcomply +  nabla

company

hello, we are ✕ Nexcomply

an Italian company building
digital rails for real needs.

We turn solar infrastructure
into an accessible, liquid, and
transparent asset class.

Backed by law,
driven by regulation.

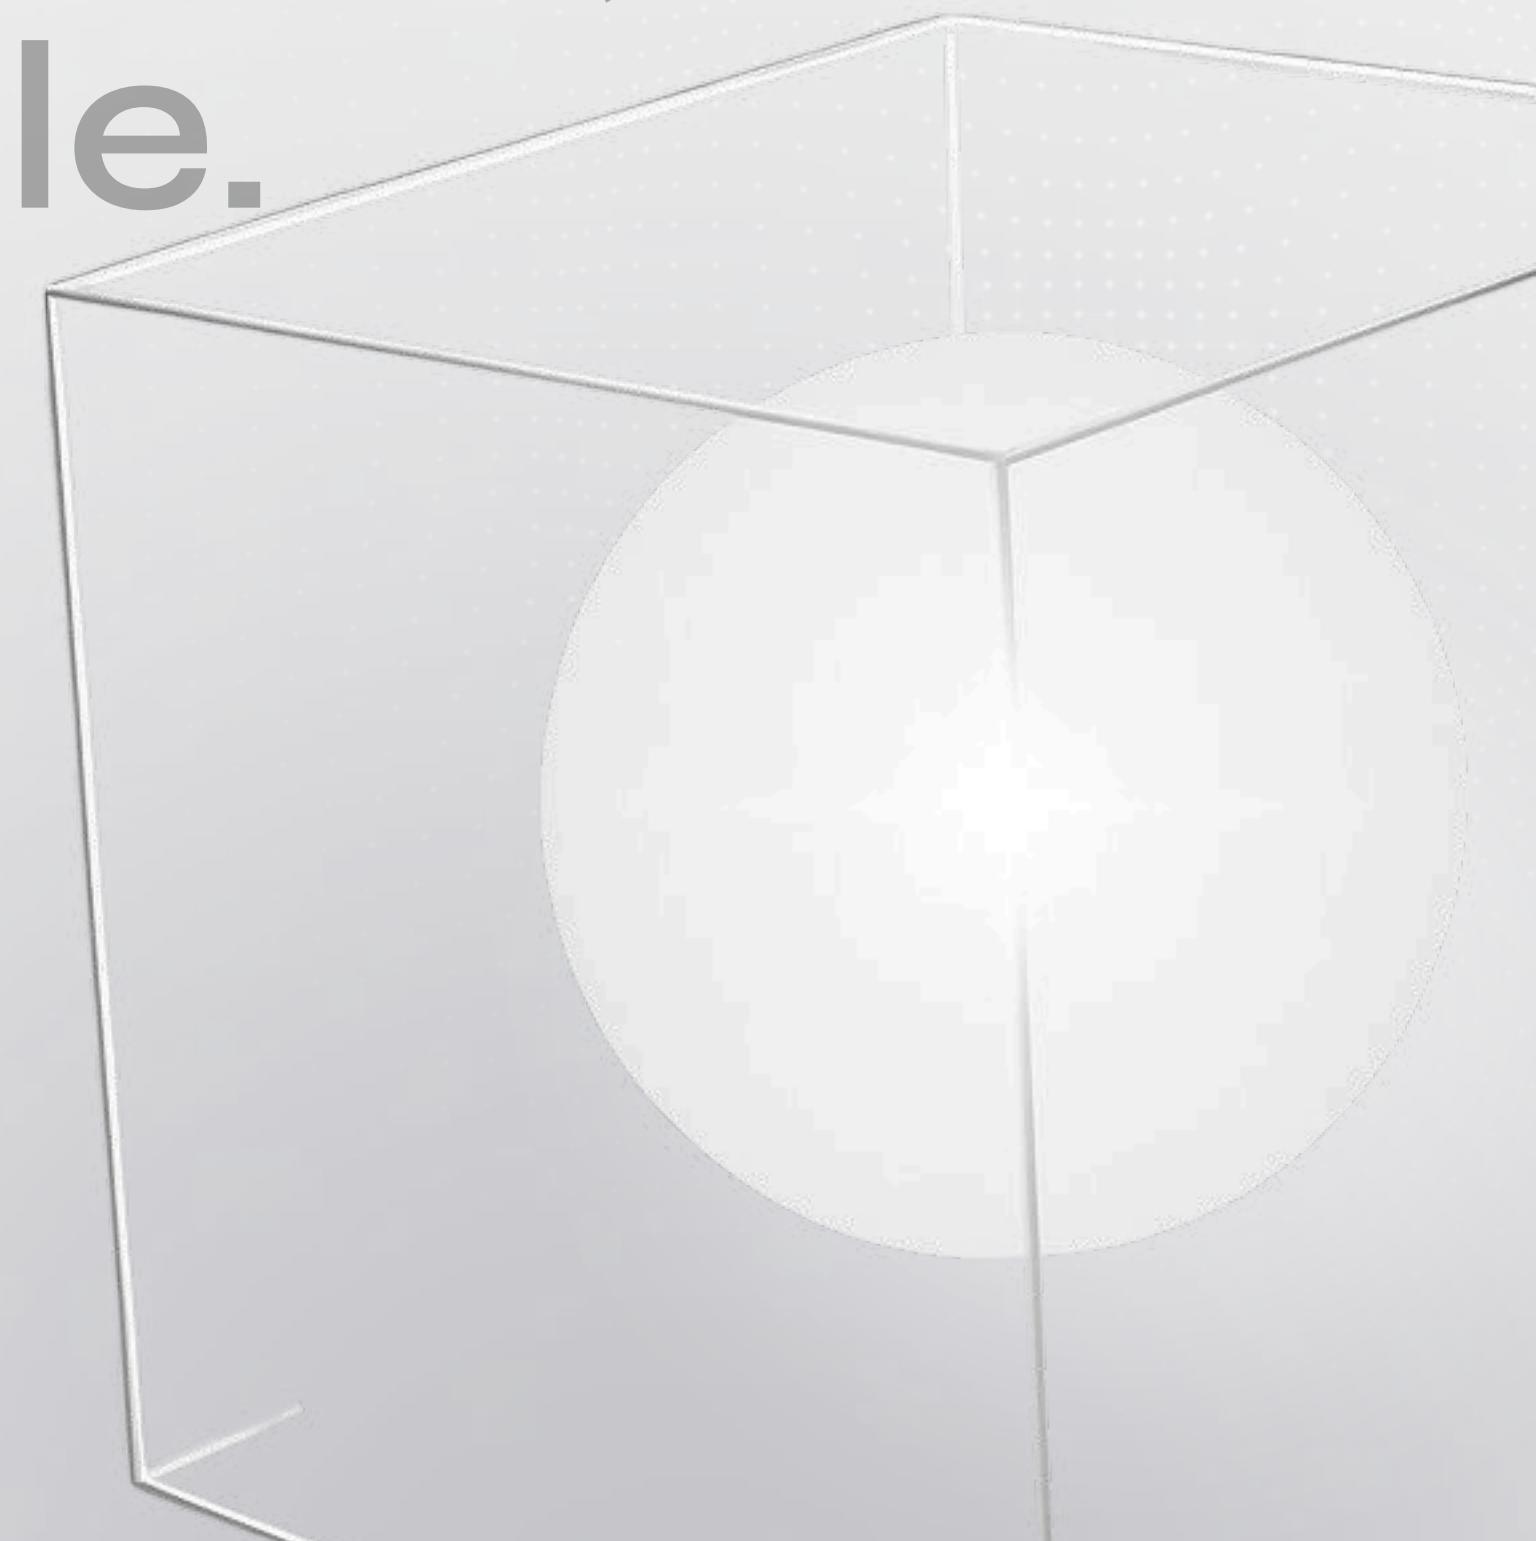

Clean energy is rising.
Ownership is not.

Thousands of plants are funded,
but not owned by the people.

lumen bridges that gap:
giving everyone access
to clean energy profits.

EXCLUSIVE ACCESS LOW VISIBILITY LOCKED CAPITAL CENTRALIZED DECISIONS

We're changing all four, from day one.

64% of investors
say ESG factors
influence their
investment
decisions

370B€

in 2024 EU
clean energy
investments, over
90% of total
energy spending.

70GW

new renewable
capacity added
in Europe in 2024,
up 9% from 2023.

without lumen

existing tools are part of the problem

Green ETFs maybe pay out in 5 years

Restriction, funding delay, illiquidity

with lumen

with our platform you will:

Join before the plant is built

Track the returns per kilowatt sold

Vote, sell, re-invest, all in one place

The gateway to every stage of energy deals

Users can explore:

- Funding target & EPC partner
- Estimated yield & revenues
- Project launch calendar

INTEGRATED COMPLIANCE, VERIFIED ACCESS, WALLET CONNECTION.

How lumen works

Each NFT is legally linked to a SPV share.

1.

Buy
plant stake
as an NFT

2.

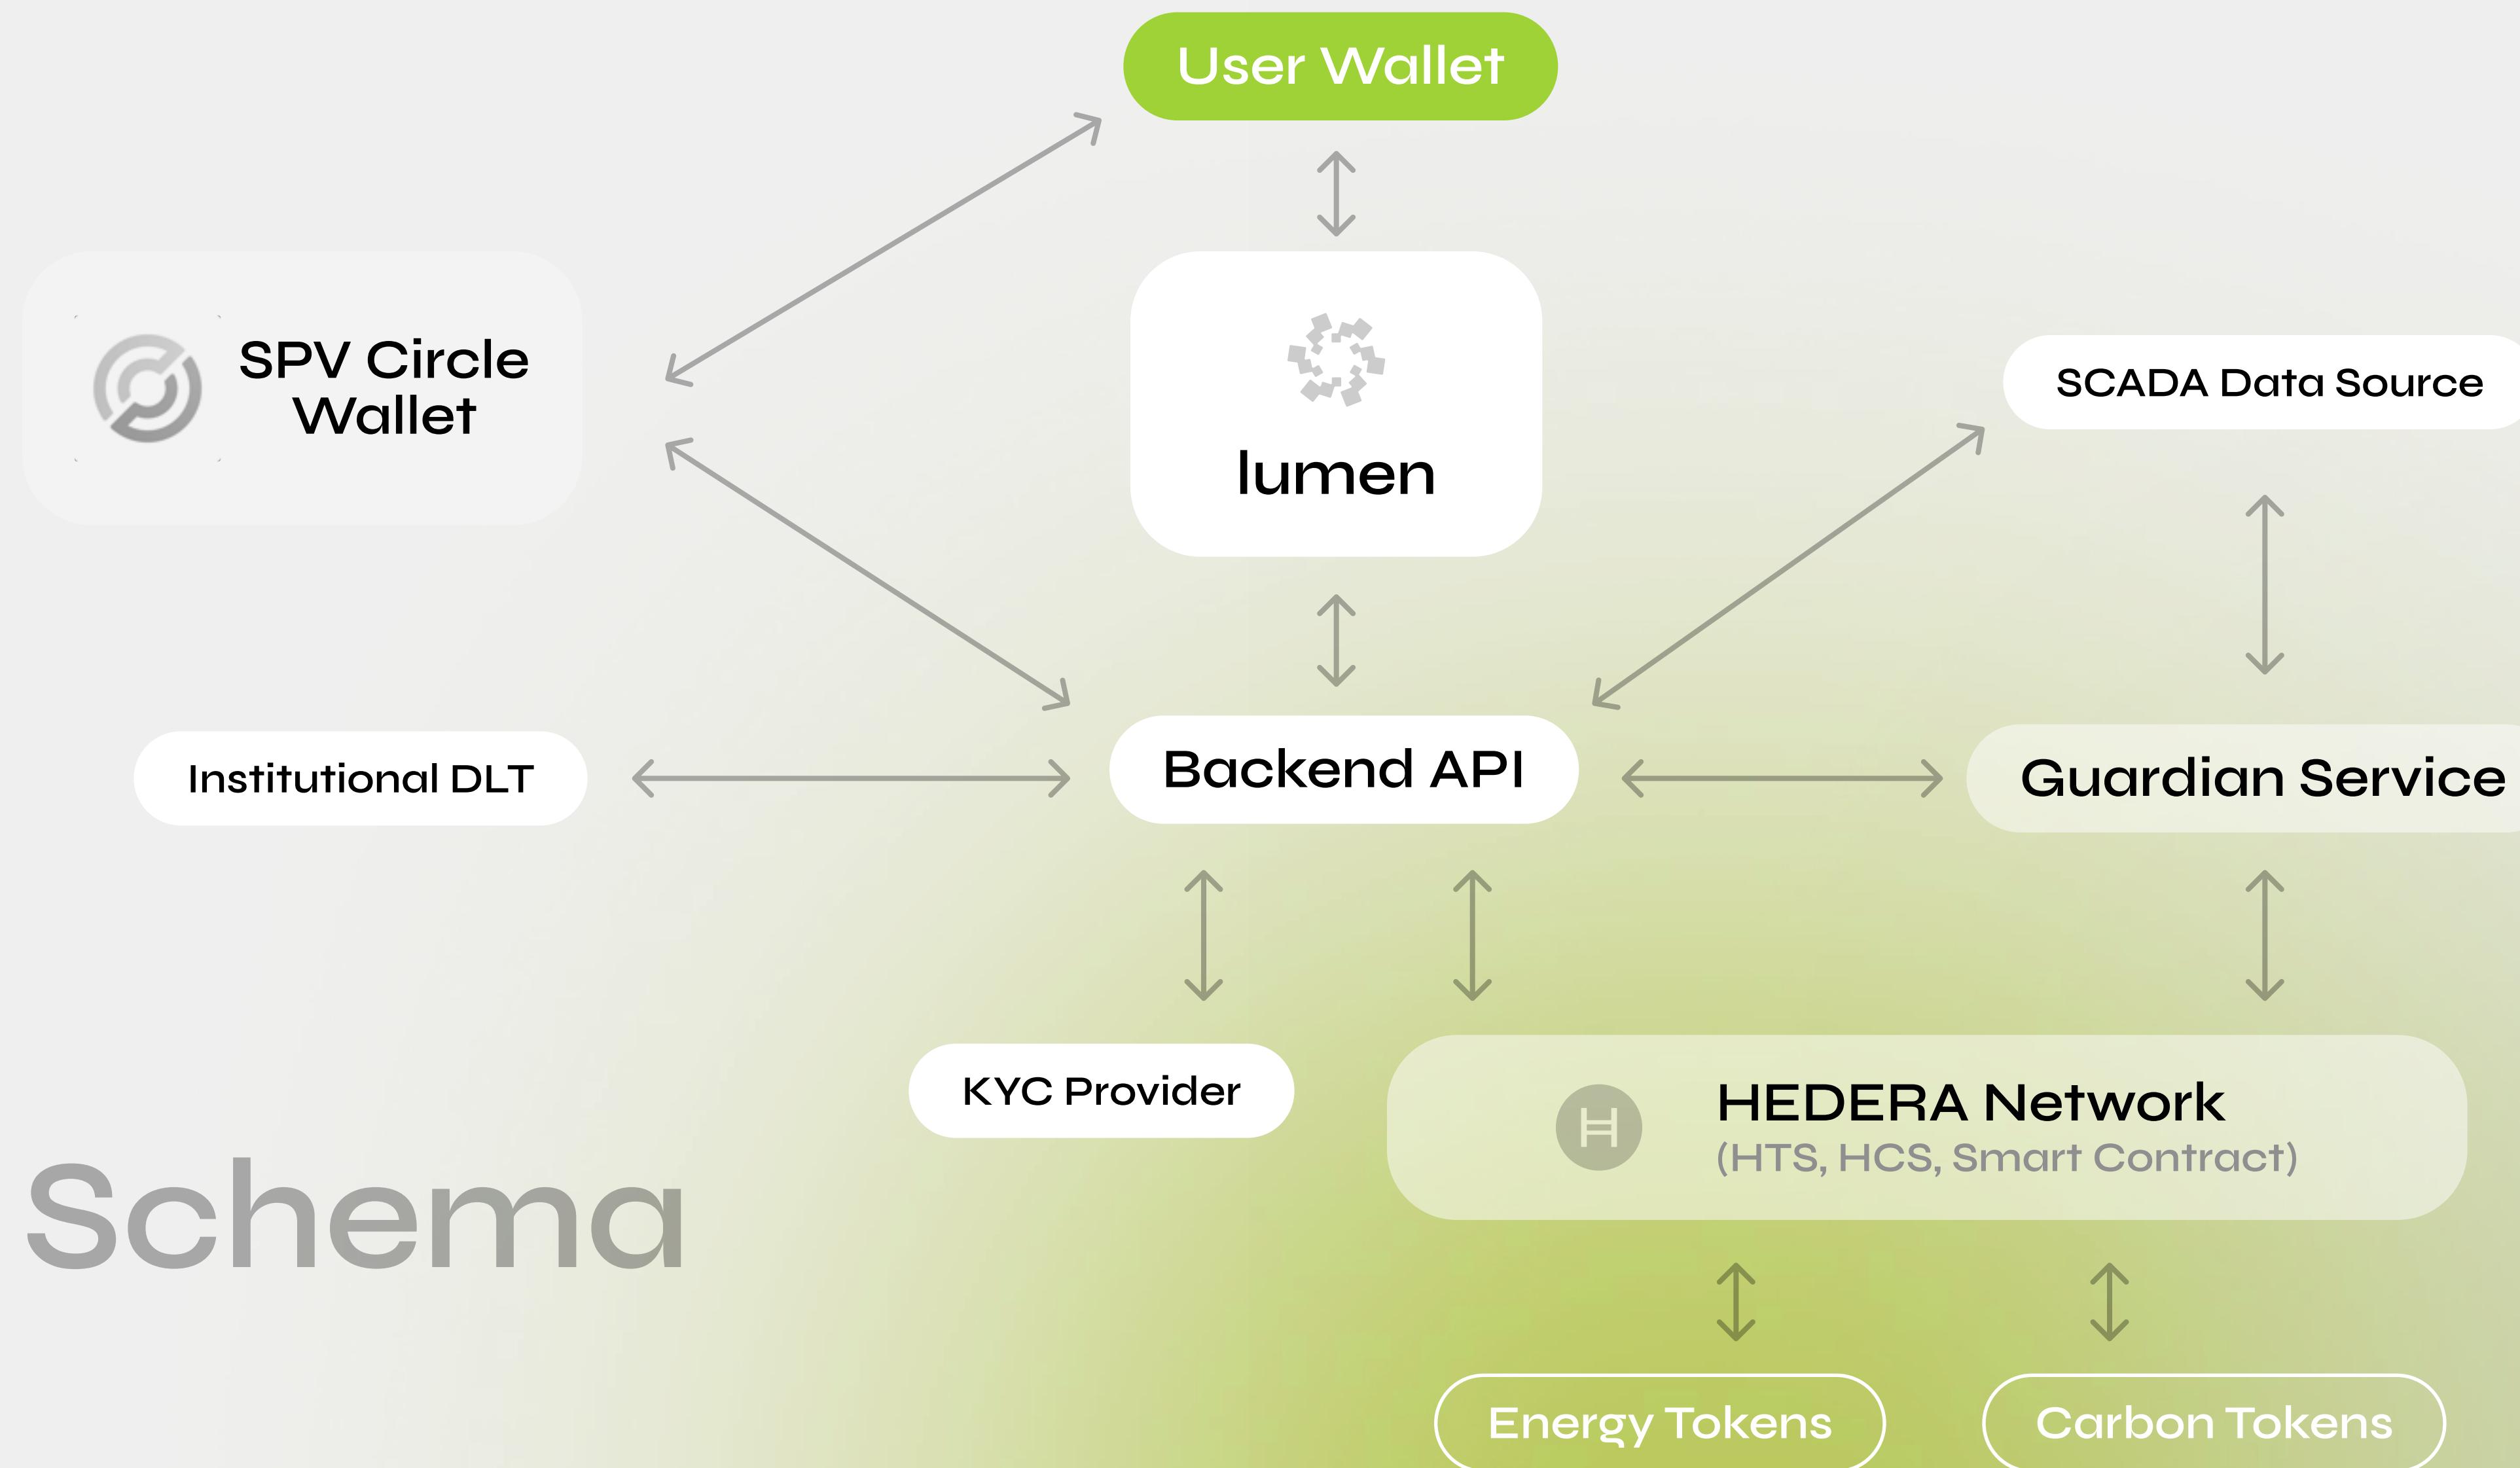

Smart contracts read
SCADA → calculate
earnings

3.

Automatic
earnings to
NFT holders

All assets are MiCAR-ready and backed by legal equity.

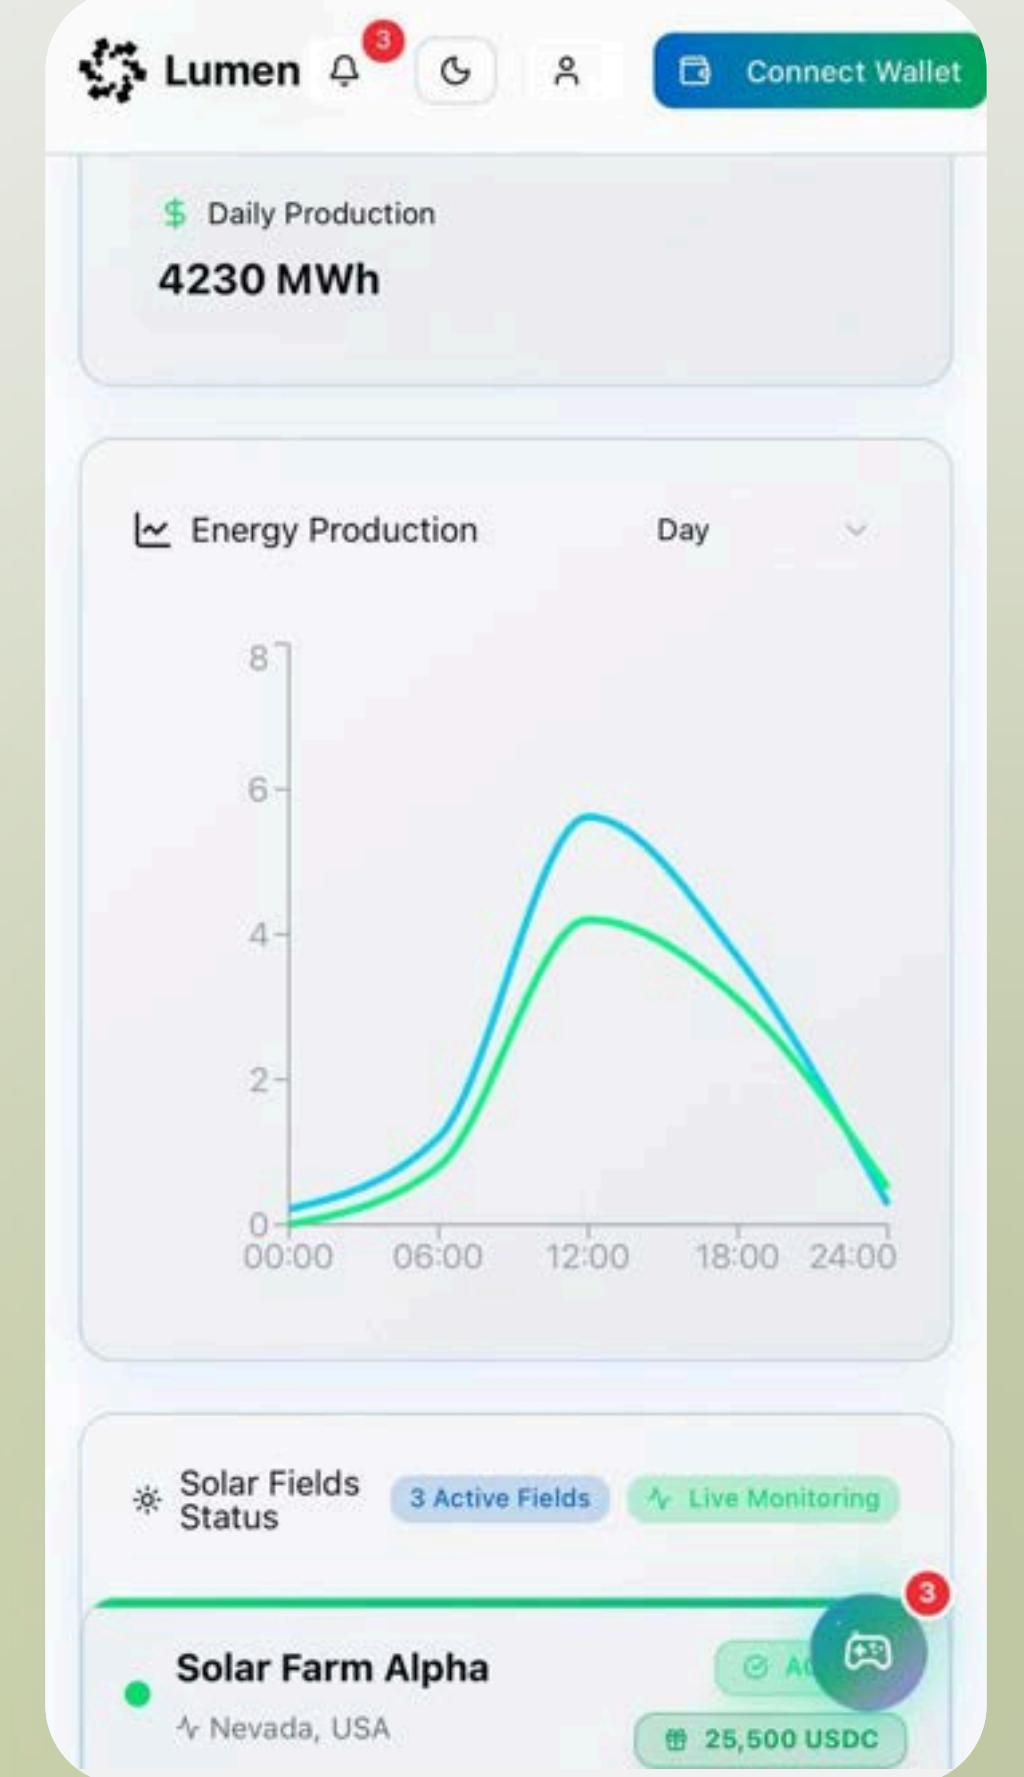

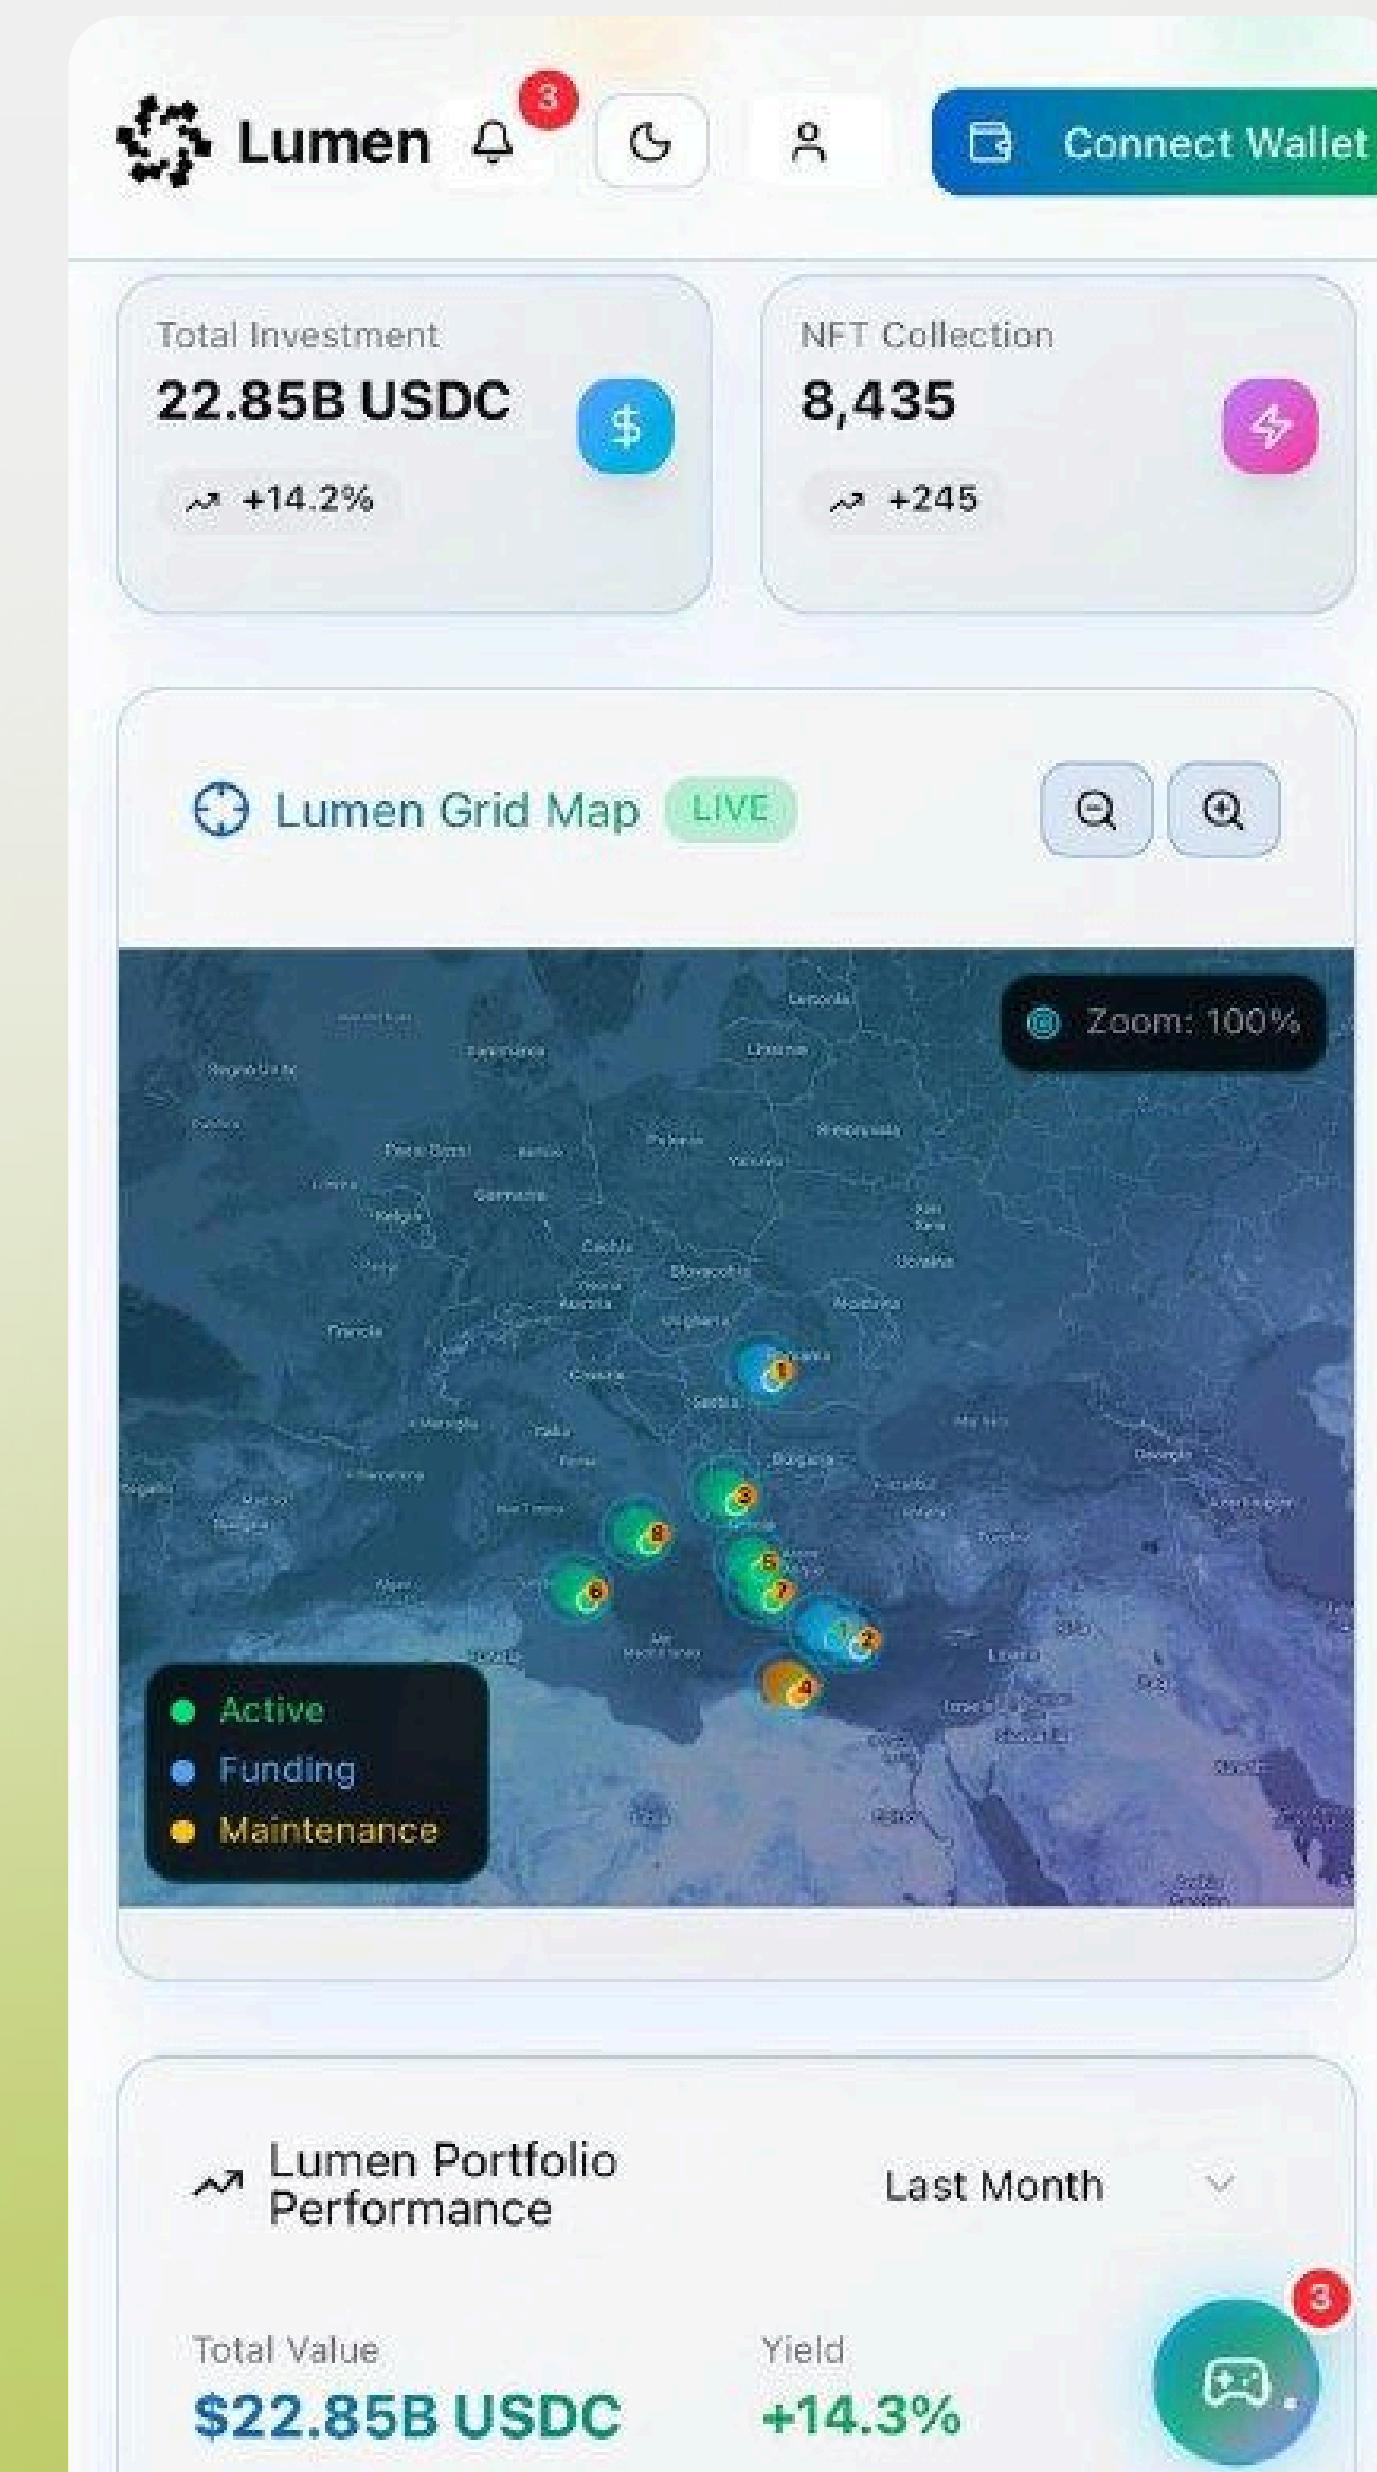

Your interactive map of ownership.

Each NFT represents a stake of a plant.
On the platform, you see:

- 1 Which plants you co-own
- 2 kWh produced daily
- 3 ROI / CO₂ savings
- 4 Health of each SPV

It's not just data. It's your digital energy dashboard.

Investing in solar is now a tap.

- 1 KYC + connect wallet
- 2 Choose a plant from the Launchpad
- 3 Buy a stake & start earning
- 4 Track everything in Grid Control

Onboard your plant even if not completed

Integrating solar plants lets corporates access international investors, enhance ESG credentials, and free capital by selling project stakes.

Tokenized funding, diversification, and real-time impact reporting boost returns and brand reputation.

Revenue Model

Transaction Fee

core

1% fee applied on the offering of each NFT in the primary market, charged during the minting phase

Secondary Market Royalty

core

1% royalty on all secondary NFT trades.
Applied automatically on each resale.

SPV Launch Fee

ancillary

€5k flat fee per SPV onboarding. Covers setup, legal compliance and platform integration.

Claim Reward Fee

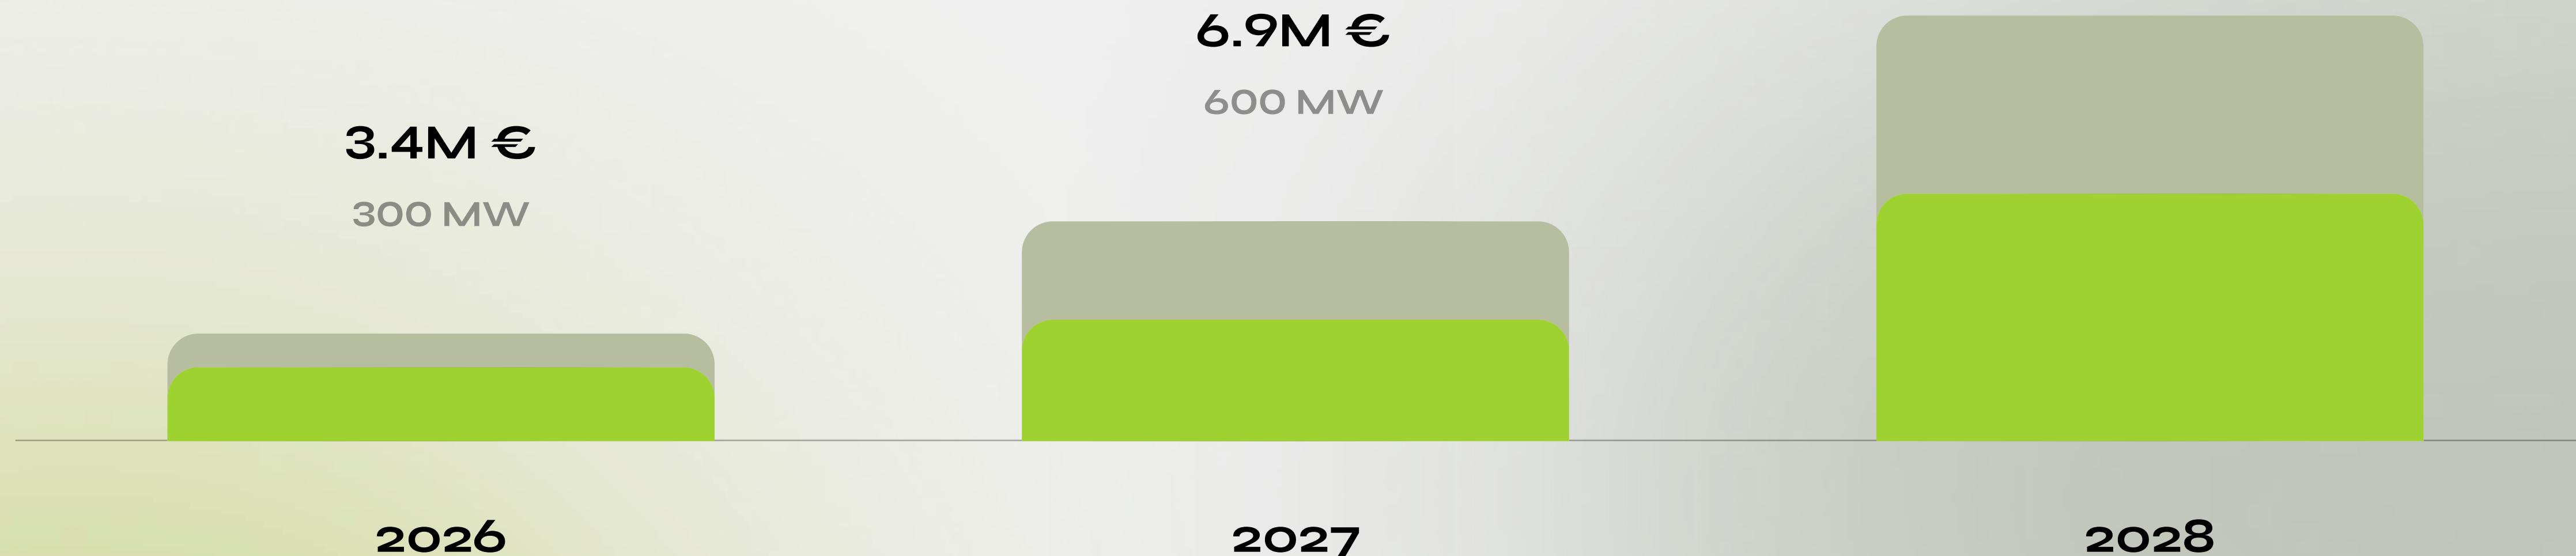

ancillary

0,50% fee applied on each user claim of accrued rewards from project performance.

Financial Projections

- TX Fees - Primary Market
- TX Fees - Secondary Market

The market targets are based on the National Integrated Energy and Climate Plan (PNIEC). Revenue estimates are calculated assuming an average construction cost of €1M per MW installed and a selling price for electricity consisting of the average PUN (National Unique Price) plus the FERX incentive.

We spend day and night thinking about how blockchain can truly solve real-world problems.

Why lumen, why Hedera?

With Hedera support and stack, we're ready to deploy and scale, just as the industry embraces real-world tokenized assets.

lumen unlocks the clean energy grid for people.
No more black-box funds. No more passive roles.
